

ADIPOSO.

FOR MEDICAL PROFESSIONAL USE

ADIPOSE-DERIVED EXOSOME TECHNOLOGY

Born from the *Source*.

*The next evolution in regenerative
aesthetics.*

Formulated with **adipose-derived exosomes** — Adexosomes — Adiposo works alongside the skin's own signaling architecture, from the surface down. **Species-matched** support, born of the same biological foundation to which it is applied — designed to assist compromised barriers, support natural recovery, and help maintain long-term dermal health.

01

Species-Matched Synergy

Exosomes sourced from the same biological foundation to which they are applied — naturally suited to work alongside the skin's own secretomes.

02

Targeted Cellular Alignment

Formulated to complement natural signaling pathways, helping skin maintain its intrinsic care and renewal processes.

03

Barrier Support & Comfort

Created to soothe and help reinforce the feel of post-procedure or otherwise compromised, stressed skin.

ENGINEERED FOR ADVANCED RECOVERY SUPPORT

APPLICATION 01

Post-Procedure Care

Formulated to help minimize visible downtime and discomfort after lasers, microneedling, or peels.

APPLICATION 02

Barrier Support

Formulated to help ease the appearance of dryness, redness, and sensitivity.

APPLICATION 03

Age-Care Support

Aims to support the feel of skin density, elasticity, and structural resilience.

BRING IT INTO YOUR PRACTICE

Integrate *Adiposo* into your recovery protocols.
